                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  /dbv_stage.*20 week-post conception fetus*
//tbb_host DH108 (ampicillin resistant)**T7730 (Pharmacia)
//note**Organ: Liver and Spleen: Vector: pT7730 (Pharmacia)
with a modified polylinker: Site_i: Pac I: Site_2: Ecc R:
This is a subtracted version of the original Soares fetal
liver spleen INFLS ilbrary. Ist strand cDNA was primed
with a Pac I - oligo(dT) primer [5'
AACTGCANGANTWANGTANGCTTWTTTTTTTTTTTT 3'],
double-stranded cDNA was ligated to Ecc RI adaptors
(Pharmacia), digested with Pac I and cloned into the Pac I
and Ecc RI sites of the modified pT73 vector. Library
went through one round of normalization. Library
constructed by Bento Soares and M.Fatima Bonaido.*

//note-"Hepetic cDNA obtained from vehicle or GH-treated
old male rats were used as driver (vehicle) and tester
(GH), or vice versa, to generate gene products that were
induced or repressed by GH. After two rounds of
subtraction and amplification, using hybridization
tester-driver ratios of 1:100 and 1:800, difference
products were cloned in the BamHl site of the pBluescript
II SK+ vector "

Rockville. M. Genomic DMA Isolated from a cloned population of 

Trypanosoma bruce! (TRED92774 GUTat 10.1) was mechanically sheared 
to give a tight size distribution to 

A kD). The v + 1 method used for the lutery construction is 
described in detail in Smith, H. and Venter J.C. (Making small 
Insert libraries for whole genome shough sequencing a Protical Approach, eds. M. Vaudin and B. 
Barrell, Oxford University Press, 1999).
